

BeX® Retail

BeX® Retail is a modern and innovative retail system that can handle tomorrow's requirements on communication and services today. Due to a web-based Backoffice one has complete control over sales, inventory, loyalty programs, campaign, finances and more, directly online no matter where you are. One can connect different stores, e-platforms and companies as well as coordinate inventory, bonus systems, gift cards and credit notes. Simultaneously the POS-program is easy and intuitive to use with touch management and pre-programmed functions for all kinds of checkout-related events.

Backoffice web based:

- Article directory with groupings for statistics and searches, variant management, price lists etc.
- Inventory module with management of outbound and inbound deliveries, warehouse management, inventory adjustments and stocktaking.
- Mobile management with barcode scanning enables a rational and secure inventory management.
- Purchase module with purchase order status, order approval, purchase delivery control, purchase planning, purchase suggestions and store restocking.
- Loyalty program with bonus system.
- Voucher ledger for the management of all vouchers in all sales channels and companies.
- Manage bonus, gift cards, credit notes and deposits.
- Posting and settlements between stores and companies is done automatically.
- Integrated finance module with invoice management, payments, payment reminders, interest invoicing, VAT and order posting and more.
- API for connecting external systems (e.g. e-trading platforms) that can retrieve and send data concerning e.g. article, prices, inventory, customers, orders, deliveries, returns, purchases, vouchers and more.
- Reports and documentation. All data can be exported to Excel.

POS-program installed locally on cash register:

- Modern and easy to use touch management with big buttons and intuitive handling.
- Register and manage customers with ease directly at the till.
- Online overview of all warehouses.
- Search for receipts with barcode and create returns and directly add reason for return.
- Redeem bonus checks, gift cards and credit notes in all stores (as well as online) with online control and automatic management of debts and settlement between companies.
- Monitoring and management of campaigns, discount codes and more.
- Reservations and customer orders.
- Payment in different currencies.
- Payment via Klarna and Swish.
- Digital receipts.
- Management of account distribution and manual cash withdrawals.
- End of day report with reconciliation and accounting of discrepancies.
